Developing A Co-Design Workshop Outline

Develop engaging content for your Co-Design Workshop

A well-designed Co-Design Workshop is a way to ensure that the Co-Design principles are well integrated into the activity and hence to ensure that the activity is effective and that the intended results are achieved.

Target/Purpose
Target: Workshop outline
Purpose: to ensure integration of co-design principles in the Co-creation of work spaces open to collaboration'

Output
Result of activity

Requirements
Laptop, Internet Connection, Projector, Workshop Facilitator

Time
3 hours

Step 1

SENSITISING — Activities aimed at guiding participants to understand a topic, such as for instance reviewing workshop material can sometimes be carried out prior to the workshop itself.

Step 2

INTRODUCTION — helps to start building a relationship amongst the participants — icebreakers are a great way of doing this.

Step 3

IMMERSION — activities such as word games, and collages which create a shared understanding for the rest of the workshop.

Step 4

GENERATION — Activities such as scenario building which help develop ideas, sometimes by analysing existing ideas and solutions.

Step 5

REFLECTION — help to create a sense of progress at the end of the workshop and to validate and finalise the results of the workshop.
